

MEDICAL BILLING AND CODING

CERTIFICATE PROGRAM

Quarter Credit Hours Required = 60

The Medical Billing and Coding certificate program is designed to serve those students interested in gaining access to entry-level positions in the medical field related to reimbursement procedures. Students will focus on the fundamentals of medical office protocol and specialized training in Current Procedural Terminology (CPT), International Classification of Diseases (ICD-9-CM), and Healthcare Common Procedure Coding System (HCPCS) coding conventions. In addition to classroom experiences, this program includes hands-on learning as part of an externship. Graduates or students who are currently in externship are eligible to sit for national certification examinations. Students typically register for the examination during their certification exam review class. Certification examinations are offered off site.

Upon successful completion of this program, students should be able to

- explain the components of the various body systems and corresponding medical terminology;
- recognize the importance of confidentiality when dealing with medical records;
- describe the essential working aspects of a successful medical office;
- demonstrate the ability to utilize codes in the practical medical reimbursement process;
- classify the various billing and coding information into a useful compendium that will avoid claims rejections;
- use computer technology software for completing medical office insurance forms; and
- coordinate a successful job search.
